# YUVARAJ K

## MERN STACK DEVELOPER

6384797769

yuvaoff27@gmail.com

vellore,TamilNadu

## SUMMARY

Recent computer science graduate passionate about full-stack development with the MERN stack. Strong academic foundation and hands-on experience crafting responsive web applications, with proficiency in MongoDB, Express.js, React.js, and Node.js. Additionally skilled in C, Python, and Java, eager to contribute to a dynamic team. A rapid learner dedicated to continuous improvement, focused on delivering solutions that meet user needs and business objectives.

## EDUCATION

**Bachelor of Computer science**

KMG College of Arts and science,Vellore

2020 – 2023

**Master of Computer Application**

Rathinam Technical campas,Coimbatore

2023 – 2025

## SKILLS

- C Programming
- Mern Stack Development
- Java Programming
- Python Programming
- Figma Designing
- GIT and GIT Hub
- Linux

## KEY SKILLS

- HTML5, CSS3, JavaScript
- Bootstrap for responsive design
- React.js for front-end
- Node.js and Express.js for back-end
- MongoDB for database management
- Git for version control

## Projects

**Online Food Delivery Website(Mern Stack)**

A MERN stack-based online food delivery website leverages MongoDB, Express.js, React, and Node.js to create a dynamic, full-stack application that manages user orders, restaurant menus, and real-time delivery tracking. The front end is built with React for a responsive UI, while Node.js and Express.js handle server-side logic and MongoDB stores data.

**Rail Pass Management System using PHP and MySQL**

The Railway Pass Management System is a web-based tool developed with PHP and MySQL that streamlines the process of issuing railway passes. It helps railway administration reduce paperwork and save time while providing an easy and quick way for people to apply for daily travel passes online.
